

# RADIATION PROTECTION SECTION

Division of Health Service Regulation • N.C. Department of Health and Human Services

## TANNING BRANCH

### SANITATION POLICY

The North Carolina Tanning Rule Section .1417(d) states, the registrant shall ensure that the protective eyewear is properly sanitized before each use. It is your responsibility to determine what type of sanitizer you wish to use on your eyewear.

However, Radiation Protection does not enforce any regulations concerning sanitation of **tanning units**. Any questions concerning the sanitation of tanning units should be directed to your distribution or service company. Our agency does not and will not promote any one product or business over another. We are responsible for radiation protection and have made the policy decision to defer to others all issues relating to sanitation. Should you have any questions regarding this matter or other aspects of the Tanning Regulations, please contact a member of our [staff](#).
